

Mallikarjuna Rao Gudipudi

SOFTWARE ENGINEER

Hyderabad, India | 9440242185 | malligmrao@outlook.com

Objective

A highly skilled and results-oriented Software Engineer with 9+ years of experience specializing in Java, Spring Boot, AWS. Adept at designing and developing scalable, secure and high-performance applications using cutting-edge technologies. Proven expertise in delivering end-to-end solutions across backend-development, cloud deployment.

Experience

Event Streaming Platform | Prudential | Cognizant – Senior Associate Nov-2023-Present

- Managed the development of spring boot microservices and implemented a comprehensive middleware flow by leveraging various AWS components including KDS, EC2, ECS, Cloud Formation and Event Bridge.
- Implemented architecture driven application for producer and consumer using Java and spring boot
- Utilized third party tools like Jenkins for CI/CD activities.
- Developed and supported existing infrastructure while implementing critical code changes of stabilize the environment.
- Skilled in the use of monitoring tools like Dynatrace.
- Applied security with JWT validation using APIGEE to generate and validate JWT token.

GI Portal | Prudential | Cognizant – Senior Associate Jun-2023 to Oct-2023

- Developed spring boot Microservices and Configuration
- Involved in design and approach of new implementation.
- Perform enhancement as part of change requests and fixing the technical issues/tickets addressed in dev, stage, prod environment.
- Involved in DR and regression testing for end-to-end application
- Integrated the apigee with microservices
- Design and Implementation of domain-based service and responsible for cloud infrastructure design
- Involved in for end-to-end application

Bread Financial | Capgemini - Senior Developer Sep-2021 to Apr-2023

- A US based banking organization is looking for it's data migration from Mainframe DB2 to Fiserv
- Worked on creating highly scalable Rest APIs using Spring Boot and test them by writing test cases using Rest assured.
- Deployed APIs in Azure by running a pipeline in Azure Devops.
- Hands on practice of Azure, Application Insights, APIM & AppService, Service bus Used Java, JPA and Maven to make calls to Mainframe webservices, Azure cosmos DB, Azure DB and Fiserv APIs

- Knowledge on deploying on AppService manually using Azure portal And automatically by generating ARM templates.

ZoomMD Reports | Meta Business Solutions - Senior Developer

Sep-2020 to Aug-2021

- Collaborated with 15+ Practitioner experts across a range of hospital domains to identify and study data sets to produce visuals reports using with i-reports tool
- Assisted in developing product roadmaps, providing specific suggestions that led to a 10% decrease in the overall timeline.
- Every month Capture Billing provides you with a customized financial reports package that allows you to closely track your practice's financial health
- Medical billing reports are giving you vital information about claims, payments, and a variety of other aspects of practice

ZoomMD | Meta Business Solutions – Senior Developer

Nov-2015 to Aug-2020

- Designed and coded unit/integration testing using proficient methodology.
- Utilized strong configuration management and version control to ensure peak system performance throughout 20+ changes
- Flexible Charting, e-prescription & e-refills, DMS, Scheduling Appointments, CDS
- Created detailed design documentation, unit test plans, and well-documented code that was used in training for the 2-week summer intern program

Education

VRS & YRN College of Engineering and Technology

2010 - 2014

Branch: Computer Science and Engineering

Project: Hostel Management System.

Percentage: 65%

Skills & abilities

- Java
- Spring Boot
- Spring
- Microservices
- React JS
- Mongo DB
- MySQL
- AWS Services (Kinesis, SQS, SNS, S3, ECS, CF, Amazon Event Bridge, RDS, EC2, SDK, Lambda)
- GIT
